

Mobile SalesMagic

Mobile Sales Force Automation

Real-Time Sales Tracking & Reporting Tool!

Mobile SalesMagic – Web-Based

Track Sales Force Activity in Real Time!

Mobile SalesMagic is a Sales Force Automation tool that allows users to receive their daily sales assignments and account information directly onto their mobile phone or PDA, communicates back to the Sales Manager's computer real-time sales progress, status of accounts, new revenue generated and so much more.

Managers can see online sales status reports and graphs which are automatically generated and can be viewed from a computer or a mobile device.

The **Mobile SalesMagic** technology creates an interactive electronic "day time schedule" of prioritized leads, appointments and meetings for sales people each day, and easily allows the sales rep to report the outcome of each sale or appointment, and offers several fun tools to help make the day much more efficient. Maps, Driving Directions, Click to Call and a variety of menu options keep the day paperless, and organized!

After each customer visit, the sales rep easily enters in the dollar amount of the sale, pending sale status, or choose several other short cut "Sales Assistant" features such as activating a reminder or notes for follow up meetings, creating great Customer Relations Management!

ALL YOU NEED IS A COMPUTER & MOBILE DEVICE!
One SEAMLESS Platform Integrates ALL Departments

All field activity is communicated back to the main office and can be viewed and tracked by graphs and sales reports, sorted, analyzed and viewed to fit your customized needs. Compare sales by week over last week, year-to-date, by territory, by book or just view the entire canvass.

Take the guess work out of daily sales figures, instead **KNOW** and report daily sales activity on-the-fly!

Mobile SalesMagic Increases Productivity and Sales

- Saves Time Organizing Your Day
- Ensures Priority Accounts are Managed FIRST
- Gives Maps, Addresses, Phone Numbers and More
- Delivers Lead Information to Rep's Mobile Device
