

Visual Cookbooks

Yellow Magic Training and Learning Tool

What are Visual Cookbooks? As you all know, manuals are great for finding out what a particular button or menu item will do, but often getting a job done requires that you know what steps need to be taken in what sequence to get it done quickly and correctly. We track questions from users, and when we see that we are getting the same questions asked about procedures, then we know it is time to make a Cookbook.

Reading a Cookbook gives you step-by-step instructions on how to do what you want. These cookbooks are great, but then we decided what would be even better is to be able to see the actual process on the Yellow Magic screen. We now have over 30 Visual Cookbooks on the TSR site.

Once you sign-in, you will see this screen:

Just click on "Visual Cookbooks" to see a list of what is available. Click on the one you want to see and watch our operator show you how to do it. Once in a Visual Cookbook, you will see green arrows at the bottom of each screen. Use these arrows to advance step-by-step through the process. You can go at your own speed and you can use the back-arrow to review what you have already seen. Give it a try today!

And if any of you have suggestions for additional Visual Cookbooks, please let us know.
