

Pre-Installation Check List

Preparing for the Installation of Your Yellow Magic System

Thank you for choosing Yellow Magic. To ensure you get the most from your Yellow Magic system and to make your installation as easy and efficient as possible, you should prepare certain information prior to our scheduled installation.

Before your operators begin entering contracts there are a number of databases that must be established. Because this information is particular to your business, you'll need to supply the information necessary to create these databases.

You can import some of this information into Yellow Magic if it can be made available in certain import formats. (Try to prepare any imported files far enough in advance for our personnel to review the data structures.) If you already have any of this information as a computer file, a programmer may be able to convert your existing data into the appropriate Yellow Magic import format. Record layouts that define the various import formats are available upon request. As an alternative to importing the data, you may key the data directly into Yellow Magic after the system has been installed.
