

Production Tips

Yellow Magic Release 2.1

12/18/2007 - The New Yellow Magic Release 2.1 offers many new features. Please review them in order to save time in production, accounting and sales. If you have not downloaded the New Release Notes, all you need to do is go to <http://www.yellowmagic.com/tsr> and into downloads you will see that Current Release 2.1 has its own link now. All of the YM21 files are located in webfiles\CURREL. The file is in a ZIP folder.

We have also made three of the PowerPoint presentations from Magic Club available for download. These presentations cover the new Alauras CRM and Ad Management products, the Digital Directories Overview, and SalesMagic, the new Mobile Sales Automation tool. While you are logged into Magic Club Downloads, click on Magic Club where you will find a folder that has the three presentations.

If you haven't upgraded to version 2.1 yet, remember, as a Magic Club member you are entitled to the FREE upgrade, so please contact our Technical Support department for upgrade details.
