Mobile SalesMagic Functionality

Menu Options:

Download Leads — offers you a quick touch menu option to download new leads: lead packets or accounts as you progress.

View Leads — gives you the ability to quickly see at a glance all of your current leads or accounts and their status using color coding. You may select accounts to view that have appointments or several other filtering selections. Next you will be able to choose each account or lead and see all the details you need to make the sales call.

View Contract — is an option that lets you see historical contracts and proposals for the new contract you are presenting to the advertiser. *View Contract* also allows you to edit the contract and then present the terms and conditions of the contract and capture your customer's digital signature for approval.

Appointments — get a quick view of all your appointments and ability to create appointments with reminders and more!

Check/Add — allows you to check if a business is assigned or not and if it is available, you may add and save it.

Sales Stats — is a way that sales reps and sales managers can quickly see sales progress and commissions earned to date. Monitor the entire Canvass, view total revenue, number of accounts sold, pending, what has already been downloaded and what additional Leads are available for download.

Marketing Material — gives you quick access to Sales Support Documents and Promotional Material you would like to share with your customer to help close a sale, share demos, video tutorials.

Mobile SalesMagic can work with other Publishing Systems besides a Yellow Magic System!

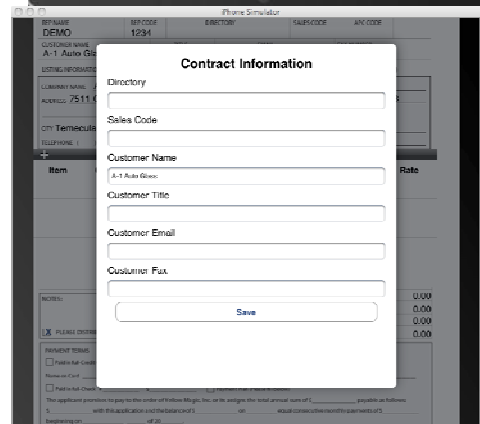

Electronic Distribution of Sales, Leads and Contracts
